Hebron Town Forest

Keeping watch on the beaver dam following Paul's reconstruction of a man-made extension to the dam using trees, rocks and wire fencing. The HCC needs to address the ongoing problem of the growing beaver dam and impacts to the road to Spec Pone. Erosion has occurred to the point of bedrock, and water is running down the roadway from the upper extend of the dam. Beavers are inactive in the winter; hopefully they will dam along the fencing. The dam will, regardless of size, always seep and cause some overflow. We need to consider how to maintain the roadway. We can also talk to ForeCo, as this road is currently the only access into the town forest.

Work Plan

January – Paul will cover the Invasives burn pile with a tarp in preparation for the Burn and BBQ with snowfall to be scheduled.
